

Mini PAL™

Positioning Support for Micro Premies

The Mini PAL Features:

- Light weight - 6 oz.
- Conforms easily to baby's size and shape
- Silky micro disc filling
- Washable and wipeable versions to meet each unit's unique needs
- Wipeable version has cloth and disposable covers

Babies of every size deserve cozy, supportive positioning.

Our Mini PAL has been specially designed to meet the unique needs of your tiniest patients by providing lightweight positioning support and proprioceptive input. The silky micro discs inside the Mini conform to each baby's shape and snuggle against them in just the right way, while the light 6 oz total weight allows it to be used with the 'legs' placed over the baby anytime they just need a little 'more'.

The Mini PAL can be used in a variety of ways:

- A tool for supporting medical equipment while taking up minimal space
- An insert in the XS Dandle® ROO2 or Dandle® ROO Lite to fill in space at the bottom of the pouch so the wings and pouch fit properly
- A lightweight positioning accessory placed gently alongside baby with the 'legs' laid over the baby's shoulders, hips or behind the head.
