Smaller, Smarter, Lighter: Built for Bedside, Discharge & Beyond.

The Ardo Bellis is a hospital breast pump that brings powerful, quiet pumping to the bedside and beyond. Weighing just 1.4 pounds with a built-in rechargeable battery, Bellis is designed for use wherever moms need it most—from postpartum rooms to discharge and home use. Its intuitive controls and advanced features make it ideal for rental programs and use throughout a hospital stay.

Automatic Power Pumping™: Mimics cluster feeding to support milk supply—no manual tracking required.

Memory Plus™ Function: Remembers mom’s preferred settings and replays entire sessions for consistency and ease.

App Connectivity: The MyArdo app supports multilingual use, tracks sessions, and enables remote control.

Consistent Power When Single or Double Pumping: Ardo delivers strong, reliable suction—no matter how you pump.

Bellis offers the power and safety of a hospital pump with the convenience moms need—anywhere in their pumping journey.

Ardo’s universal pump set system simplifies staff training and workflows while offering a range of pump sets, flange sizes, and inserts to ensure a comfortable, custom fit for every mom.
