DeTach Hospital Kit

Detachable Flanges for Personalized Fit

Key Features:

- Compatible with all Ardo breast pumps, including hospital pumps
- Includes 21mm OR 24mm detachable breast shells with 50ml colostrum containers
- Fully sterile, with an interchangeable shell design
- An 18mm detachable breast shell set is available separately
- The 24mm detachable breast shell is compatible with silicone flange inserts (available separately)
- Completely closed system

Ardo's DeTach Hospital Kit is a sterile pump set designed to support flexibility and individualized fit for optimizing milk volume and enhancing comfort.

Detachable breast shells make switching flange size a breeze without complicating cleaning. The 24mm breast shell is compatible with silicone inserts (available separately), enabling size customization without the need for additional pump sets.
